EDUCATION

Federal University of Technology, Minna

B.Eng Computer Engineering

Graduation date: June 2023

4.02 of 5.0

Relevant Courses: Software Engineering I and II, Computer Programming and Languages (C, C++), Study of Programming Languages (Java), Data Structures and Algorithms.

Technical Skills: Android Studio (5yrs+), VS Code (5yrs+), Git (4yrs+), Flutter (4yrs+), Dart (4yrs+), Firebase (2yrs+), Supabase (1yr), Contentful CMS (1yr), Stacked (2yrs), Riverpod (2yrs+), MobX (<1yr), Clean Architecture, MVVM, Algolia (1yr), Dynamic Yield, BazaarVoice, SQLite (2yrs), Hive, Java (2yrs), Google Play Store (3yrs+), App Store (1yr), Codemagic, Kotlin (<1yr), NOSTR + Rust (<1yr).

EXPERIENCE

- **Software Engineer, Teesas, January 2026 - Present.**
- Software Engineer, Internet Privacy Foundation, **May 2025 - December 2025.**
- Software Engineer, Feature/mind, **December 2023 - July 2025.**
- Open Source Contributor, Marmot Protocol, **May 2025 till date.**
- Flutter Developer, Hotel Travel Inc **March 2022 - December 2023.**
- Open code contributor, Zuri Chat, **December 2022 - December 2023.**
- Contributor, WorkshopApps, **December 2022 - December 2023.**
- Software Engineer, Zuri Chat (Flutter Developer Track Finalist at HNGi8 remote internship), **August 2021 - October 2021.**
- IT Support Intern, Al-Hikmah University Ilorin ICT centre, **June 2021 - September 2021**
- Android Lead, Google Developer Students Club (FUTMinna chapter) **2019 - 2021.**
- Android Lead, Ingressive for Good (FUTMinna chapter) **2020 - 2021.**
- Student Work Experience Program (SWEP), Federal University of Technology, Minna, **September 2018 - October 2018.**

PROJECTS - [\[portfolio link\]](#)

Teesas Education - Team Project, Teesas

2026

- Co-building an all-in-one gamified learning app for Nigerian students (Grades 1-6 through JSS1-SS3) with video lessons, live tutoring, and exam prep for JAMB, WAEC, and NECO, delivered in English and local languages (Yoruba, Igbo, Hausa). Built with **Flutter/Dart**, **MobX**, and **Clean Architecture**. 100k+ downloads.

White Noise - Internet Privacy Foundation

May 2025 - Dec 2025

- Contributed to a powerful decentralized, privacy-first messaging app (Marmot Protocol) powered by **Flutter/Dart** with a **Rust MLS** crate integration over **NOSTR**, enabling end-to-end encrypted group messaging with no central server to trust.

Nahdi - Team Project, Feature/mind

Dec 2023 - June 2025 (Live, in maintenance)

- Used **Flutter/Dart** to co-build a highly dynamic, pixel-perfect and localised application powered by the **Contentful CMS**, connecting **1,100+ pharmacies** to **1M+ active users** across the Middle East. **Algolia** powers search, **Dynamic Yield** drives personalisation, and **BazaarVoice** powers ratings & reviews. Built with **Hive** for local storage, **Riverpod** for state management, and **Clean Architecture**.

5M+ downloads · 4.6 stars on Playstore

Biuda - Solo Project

2025

- Built a mobile EdTech app teaching children and teenagers tech skills through live classes, self-paced lessons, and hands-on projects spanning coding, design, Python, AI, and game development, using **Flutter/Dart**, **Riverpod**, and **Clean Architecture**. Gamified progress and an AI-personalised learning path keep young learners engaged.

Hotels.ng - Team Project, Hotels NG

2022 - 2023

- Co-built the booking app for Nigeria's leading hotel marketplace using **Flutter**: search 10,000+ hotels across 1,000+ cities, filter by budget, and book, cancel, or extend a stay in a few taps. Built with **Provider/ChangeNotifier**. 10k+ downloads.

Cash Register by Timbu - Team Project, Hotels NG

2023

- Used **Flutter/Dart** to co-build a multi form-factor, flavoured and offline-first application that helps individuals or businesses record transactions accurately, handle payments seamlessly, and generate professional receipts. This project was built using **SQLite** for local storage, **Stacked** for state management and **MVVM** for project architecture.

DigiBot - Final Year Project

Dec 2022 - June 2023

- Used **Flutter/Dart** to build a remote monitoring and control mobile application for a weed robot. **Firebase** was used as the BaaS. This project was built using **Stacked** for state management and **MVVM** for project architecture.

TrackHub Rider App - Contract

December 2021 - Feb 2022

- Used **Flutter/Dart** to build a logistic service application that helps users pick up or deliver items from or to the destination of their choice. This project was built using **Stacked** for state management and **MVVM** for project architecture.

Zuri Chat Mobile App Group Project - Remote Internship

August 2021 - Oct 2021

- Zuri Chat is a modern business communication platform aimed at reducing the complexity of collaboration and progress tracking of workspace activities by facilitating all communications in a single application. Powered by a well-structured backend, it was built by my team in HNGi8 internship with **Flutter (Stacked state management + MVVM)**. I was a **repo maintainer** during the internship and the Flutter mobile **team lead** in the post-internship program.

LearnHub Group Project - GADS2020

October 2020

- Used **Java** to develop an education-based Android app that allows teachers to upload course resources for students, set quizzes and more. Powered with **Firebase**. [Team-Educaty community project for Google Africa Developer Scholarship 2020].

Kitaabul - Adhkaar Personal Project

July 2020

- Used **Java** to develop an Android app for a school that consists of Islamic supplications. 4.9 stars, 100+ installations.

Al-Maathuraat Personal Project

2020

- Used **Java** to build an Android app that makes the daily morning and evening supplications (al-Ma'thurat) easier to keep up with, fully transliterated, with a built-in counter and 50 authentic supplications. Built with **MVVM**. 5.0 stars, 500+ downloads.

RegApp Personal Project

Dec 2019

- Used **Java** to develop an Android app for an annual camping programme participants' registration. **Solved** yearly (on paper) record keeping and financial mismanagement. It has been **fully adopted** by the organisers. Powered with **Firebase**.

Airtel MiFi Group Project - Fun Project

November 2019

- Used **Flutter** to develop a mobile app for Airtel MiFi devices that allows users to conveniently manage their Mifi devices without having to open their browser every time.

ACTIVITIES/LEADERSHIP

- Member of the Open Source contributors at Marmot Protocol - IPF (White Noise).
- Member of the open-code contributors of Zuri Chat.
- Member of the core team (Android lead) for the first-ever GDSC Chapter in my school for two consecutive terms (2019/2020 and 2020/2021).
- Member of the core team (Android lead) for the first-ever Ingressive for Good Chapter (2020/2021) in my school.
- Facilitated bootcamps for Android (GDSC) and Flutter (I4G) which resulted in a dramatic increase of the number of Android developers on campus from almost nothing to 30+, the whole on-campus developer community (with the help of the core team members) to 300+ strong.
- Once a FUTMx Dev Circle core team member.
- Active member – GDG Minna, GDG Ilorin.

HONOURS / AWARDS

- One of approx 300 finalists from the initial 12,000 interns that started HNG internship 8.
- One of the few awarded for immense contribution across 4 departments, 400+ students, in the Student Work Experience Program (SWEP) organised by the school at the end of academic year 2 (October 2018).
- Called out in [Feature/mind's LinkedIn announcement](#) celebrating the Nahdi launch.
- Called out in [Patrick Chukwu's LinkedIn post](#) celebrating Biuda's product launch.
